

Daraz Load Testing Report

Test Scope:

Home Page and Registration Page

Test Results:

- **50 concurrent hits:** Executed successfully without errors
- **100 concurrent hits:** Executed successfully without errors
- **500 concurrent hits:** Executed successfully without errors
- **1,000 concurrent hits:** Executed successfully without errors
- **5,0000 concurrent hits:** Error messages were generated during execution

Summary:

The system performed reliably under load conditions up to 1,000 concurrent hits. However, performance issues and error responses were observed when the load was increased to 5,0000 concurrent hits, indicating a potential scalability limitation.
